## ***Owner's Manual & Installation Instructions***

*Chest—Manual Defrost Models:*

FCM5  
FCM7  
FCM9

# IMPORTANT SAFETY INFORMATION. READ ALL INSTRUCTIONS BEFORE USING.

## ⚠ WARNING!

*Use this appliance only for its intended purpose as described in this Owner's Manual.*

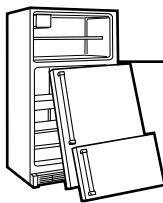

## SAFETY PRECAUTIONS

*When using electrical appliances, basic safety precautions should be followed, including the following:*

- This freezer must be properly installed and located in accordance with the Installation Instructions before it is used.
  - Do not allow children to climb, stand or hang on the shelves in the freezer. They could damage the freezer and seriously injure themselves.
  - After your freezer is in operation, do not touch the cold surfaces, particularly when hands are damp or wet. Skin may stick to these extremely cold surfaces.
  - Do not store or use gasoline or other flammable vapors and liquids in the vicinity of this or any other appliance.
  - Unplug the freezer before cleaning, making repairs or changing the light bulb.
- NOTE:** *We strongly recommend that any servicing be performed by a qualified individual.*
- Turning the control to the **OFF** position does not remove power to the light circuit on models with interior light.
  - Do not refreeze frozen foods which have thawed completely.
  - The maximum amount of food your freezer is designed to freeze at one time is approximately 3 pounds (1.5 kg) per cubic foot of freezer capacity. In normal position, your freezer's temperature control will maintain sufficiently low temperatures in the freezer to freeze recommended quantities of food.
  - Caution should be used when removing the door of a freezer. Particular caution should be used when removing the lid of a Chest freezer, as most Chest freezer lids are under spring tension. Contact the manufacturer's representative for a method of safe removal.

# ⚠ DANGER! RISK OF CHILD ENTRAPMENT

## PROPER DISPOSAL OF THE FREEZER

*When using electrical appliances, basic safety precautions should be followed, including the following:*

Child entrapment and suffocation are not problems of the past. Junked or abandoned refrigerators and freezers are still dangerous...even if they will sit for "just a few days." If you are getting rid of your old refrigerator or freezer, please follow the instructions below to help prevent accidents.

### **Before You Throw Away Your Old Refrigerator or Freezer:**

- Take off the doors.
- Leave the shelves in place so that children may not easily climb inside.

### **Refrigerants**

All refrigeration products contain refrigerants, which under federal law must be removed prior to product disposal. If you are getting rid of an old refrigeration product, check with the company handling the disposal about what to do.

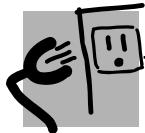

## USE OF EXTENSION CORDS

*Because of potential safety hazards under certain conditions, we strongly recommend against the use of an extension cord.*

However, if you must use an extension cord, it is absolutely necessary that it be a UL-listed (in the United States) or a CSA-listed (in Canada), 3-wire grounding type appliance extension cord having a grounding type plug and outlet and that the electrical rating of the cord be 15 amperes (minimum) and 120 volts.

## **IMPORTANT SAFETY INFORMATION. READ ALL INSTRUCTIONS BEFORE USING.**

### **⚠ WARNING!**

#### **HOW TO CONNECT ELECTRICITY**

*Do not, under any circumstances, cut or remove the third (ground) prong from the power cord. For personal safety, this appliance must be properly grounded.*

The power cord of this appliance is equipped with a 3-prong (grounding) plug which mates with a standard 3-prong (grounding) wall outlet to minimize the possibility of electric shock hazard from this appliance.

Have the wall outlet and circuit checked by a qualified electrician to make sure the outlet is properly grounded.

If the outlet is a standard 2-prong wall outlet, it is your personal responsibility and obligation to have it replaced with a properly grounded 3-prong wall outlet.

The freezer should always be plugged into its own individual electrical outlet which has a voltage rating that matches the rating plate.

This provides the best performance and also prevents overloading house wiring circuits which could cause a fire hazard from overheated wires.

Never unplug your freezer by pulling on the power cord. Always grip plug firmly and pull straight out from the outlet.

Repair or replace immediately all power cords that have become frayed or otherwise damaged. Do not use a cord that shows cracks or abrasion damage along its length or at either end.

When moving the freezer away from the wall, be careful not to roll over or damage the power cord.

**READ AND FOLLOW THIS SAFETY INFORMATION CAREFULLY.**

**SAVE THESE INSTRUCTIONS**

## Starting the Freezer

- 1** Clean the inside of the freezer with a mild solution of baking soda and water (see *Care and Cleaning*).
- 2** Connect cord to power outlet.
- 3** On models with a Temperature Monitor or High-Temp Alarm Switch, set the switch to the **OFF** position.
- 4** Make sure the temperature control is set at **4**.
- 5** Allow freezer to operate for at least four hours before placing food inside.
- 6** On models with a Temperature Monitor or High-Temp Alarm Switch, set the switch to the **ON** position.

## Temperature Control

Freezing temperature selection is made by setting the control from **1** to **7** (coldest).

If you want colder or warmer temperatures, adjust the control one step at a time.

Allow several hours after each one-step adjustment for the freezer temperature to stabilize.

Turning the control to the **OFF** position stops the cooling process but does not shut off power to the freezer.

## **About the operation of your freezer.**

---

### **Power-On Light** *(on some models)*

The Power-On Light indicates that the freezer is properly connected to the electrical power.

The light glows even when the temperature control is turned off.

---

### **Key-Ejecting Lock** *(on some models)*

The key for the spring-loaded lock is automatically ejected—key will not remain in lock in either the open or closed position.

*Keep the key out of reach of children and away from the freezer.*

In most climates, defrosting will be necessary only about twice a year.

***To have your freezer operate most efficiently, do not permit more than 1/2" (13 mm) of frost to accumulate on the shelves.***

To remove frost, scrape with a plastic or wood spatula or scraper.

***Do not use an ice pick or sharp-edged instrument*** as it may damage or scratch the freezer.

***Do not use any electrical device in defrosting your freezer.***

## For Complete Defrosting

**1** Turn the temperature control to the **OFF** position and unplug the freezer.

**2** Remove all food and place it in corrugated boxes, insulated bags, picnic coolers, etc. Use towels and newspapers for insulation as needed.

**3** With the door/lid open, use pans of hot water to speed loosening of frost. Remove large pieces before they melt.

Chest models have a defrost water drain at the front.

**NOTE:** Water may drip from the back flange of the lid cover during defrosting. This is normal. Ice builds up in the lid insulation when the lid is open for adding or removing food, and melts during the defrosting operation.

**4** Sponge excess water from the bottom of the freezer as it collects to prevent overflowing.

**5** After defrosting, clean the inside of the freezer (see *Care and Cleaning*).

**6** Replace the drain plug inside the cabinet and the cap on the defrost drain. Fold over and dry the gasket on the hinge side of the lid.

**7** Plug in the freezer. Return the temperature control to its previous position and return food to the freezer.

## Care and cleaning of the freezer.

### Cleaning Your Freezer

**Outside.** Protect the paint finish. The finish on the outside of the freezer is a high quality, baked-on paint finish. With proper care, it will stay new-looking and rust-free for years. Apply a coat of appliance polish wax when the freezer is new and then at least twice a year. Appliance polish wax also works well to remove tape residue from freezer surfaces.

**Keep the finish clean.** Wipe with a clean cloth lightly dampened with appliance polish wax or mild liquid dishwashing detergent. Dry and polish with a clean, soft cloth. Do not wipe the freezer with a soiled dishwashing cloth or wet towel. Do not use scouring pads, powdered cleaners, bleach or cleaners containing bleach.

**CAUTION:** *Care should be taken in moving the freezer away from the wall. All types of floor coverings can be damaged, particularly cushioned coverings and those with embossed surfaces.*

**Inside.** Clean the inside of your freezer at least once a year. We recommend that the freezer be unplugged before cleaning. If this is not practical, wring excess moisture out of sponge or cloth when cleaning in the vicinity of switches, lights or controls.

Use warm water and baking soda solution—about a tablespoon of baking soda to a quart of water. Rinse thoroughly with water and wipe dry. Do not use cleaning powders or other abrasive cleaners.

An open box of baking soda in the freezer will absorb stale freezer odors. Change the box every three months.

### In Case of Extended Power Failure

- Keep freezer door/lid closed. Your freezer will keep food frozen for 24 hours provided warm air is not admitted.
- If freezer is out of operation for 24 hours or more, add dry ice. Leave ice in large pieces. Add more ice as required.

**WARNING:** Handling of dry ice can cause freezing of the hands—gloves or other protection is recommended.

- If dry ice is not available, move food to a frozen food locker temporarily—until power is restored.

### Preparing to Move

Disconnect the power cord plug from the wall outlet. Remove foods, defrost and clean the freezer.

Secure all loose items such as grille and shelves by taping them securely in place to prevent damage.

Be sure freezer stays in upright position during actual moving and in van. The freezer must be secured in van to prevent movement. Protect outside of freezer with blanket.

### Preparing for Vacation

To maintain freezer in operation during vacations, be sure your house power is not turned off. For sure protection of freezer contents, you may want to ask a neighbor to check the power supply and freezer operation every 48 hours.

For extended vacations or absences, you may prefer to move your frozen foods to a storage locker temporarily. If your freezer is to be left empty, disconnect power cord plug from wall outlet. To prevent formation of odors, place open box of baking soda in freezer and leave freezer door/lid open.

When the freezer is not operating, it can be left in an unheated house or room without damage to cabinet or mechanism.

## **Preparing to install the freezer.**

***Read these instructions completely and carefully.***

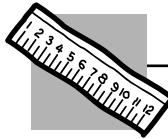

### ***Freezer Location***

Your freezer should be conveniently located for day-to-day use in a dry, well-ventilated room.

Do not install the freezer where the temperature will go below 0°F or above 110°F, because it will not maintain proper temperatures.

Be sure to install your freezer on a floor strong enough to support it when it is fully loaded.

The freezer must be solidly positioned on the floor if it is to function at its best. Shims may be used to accomplish this wherever the floor is too uneven. If the place selected for the freezer is damp or moist, place 2 X 4's (51 mm X 102 mm) under its entire length to assure adequate support.

### ***Clearances***

On all models, allow 3" (76 mm) on top, back and sides for proper air circulation.

These things are normal and do not indicate a need for service.

- A warm cabinet exterior as the refrigeration system transfers heat from the inside to the outside through the exterior cabinet walls.
- The sound of the high-efficiency compressor motor.

## Before you call for service...

**Troubleshooting Tips**  
Save time and money! Review the charts on the following pages first and you may not need to call for service.

Problem	Possible Causes	What To Do
<b>Freezer does not operate or Power-On Light is not on</b>	Temperature control in <b>OFF</b> position.  Freezer is unplugged.  The fuse is blown/circuit breaker is tripped.	• Move the control to a temperature setting.  • Push the plug completely into the outlet.  • Replace fuse or reset the breaker.
<b>Freezer starts/stops too frequently</b>	Door/lid left open.  Too frequent or too long door/lid openings.  Temperature control set too cold.	• Check to see if package is holding door/lid open.  • See <i>About the operation of your freezer</i> .
<b>Freezer operates too long</b>	Door/lid left open.  Too frequent or too long door/lid openings.  Temperature control set too cold.  Inadequate air circulation space around cabinet.  Fast Freeze switch is in the <b>ON</b> position (on some models)	• Check to see if package is holding door/lid open.  • See <i>About the operation of your freezer</i> .  • See <i>Preparing to install the freezer</i> .  • See <i>About the operation of your freezer</i> .
<b>Noisy operation or cabinet vibrates</b>	Floor may be weak, causing freezer to vibrate when compressor is on.  Cabinet is not positioned solidly on floor.	• Placing 2 X 4's (51 mm X 102 mm) under the length of the freezer will help support it and may reduce vibration.  • See <i>Preparing to install the freezer</i> . Or use shims for uneven floor.
<b>Freezer temperature too warm</b>	Door/lid left open.  Too frequent or too long door/lid openings.	• Check to see if package is holding door/lid open.

**NOTE:** Do not return the freezer to the store where you purchased it. The freezer is eligible for in-home service. For warranty service, contact us at [ge.com](http://ge.com), or call 800.GE.CARES (U.S.), or 1.800.561.3344 (Canada).

## GE Service Protection Plus<sup>TM</sup>

GE, a name recognized worldwide for quality and dependability, offers you Service Protection Plus<sup>TM</sup>—comprehensive protection on all your appliances—**No Matter What Brand!**

### Benefits Include:

- Backed by GE
- All brands covered
- Unlimited service calls
- All parts and labor costs included
- No out-of-pocket expenses
- No hidden deductibles
- One 800 number to call

***We'll Cover Any Appliance.  
Anywhere. Anytime.\****

You will be completely satisfied with our service protection or you may request your money back on the remaining value of your contract. No questions asked. It's that simple.

Protect your refrigerator, dishwasher, washer and dryer, range, TV, VCR and much more—**any brand!** Plus there's no extra charge for emergency service and low monthly financing is available. Even icemaker coverage and food spoilage protection is offered. You can rest easy, knowing that all your valuable household products are protected against expensive repairs.

Place your confidence in GE and call us in the U.S. toll-free at **800.626.2224** for more information.

\*All brands covered, up to 20 years old, in the continental U.S.

# Consumer Product Ownership Registration

Dear Customer:

Thank you for purchasing our product and thank you for placing your confidence in us. We are proud to have you as a customer!

**Follow these three steps to protect your new appliance investment:**

**1**

Complete and mail  
your Consumer  
Product Ownership  
Registration today.  
Have the peace of  
mind of knowing we  
can contact you in  
the unlikely event of a  
safety modification.

**2**

After mailing the  
registration below,  
store this document  
in a safe place. It  
contains information  
you will need should  
you require service.  
Our service number is  
800 GE CARES  
(800.432.2737).

**3**

Read your Owner's  
Manual carefully.  
It will help you  
operate your new  
appliance properly.

**Model Number**

**Serial Number**

**Important: If you did not get a registration card with your product, detach and return the form below to ensure that your product is registered, or register online at [ge.com](http://ge.com).**

# Freezer Warranty.

All warranty service provided by our Factory Service Centers, or an authorized Customer Care® technician. To schedule service, on-line, 24 hours a day, contact us at [ge.com](http://ge.com), or call 800.GE.CARES (U.S.), 1.800.561.3344 (Canada). Please have serial number and model number available when calling for service.

Staple your receipt here.  
Proof of the original purchase date is needed to obtain service under the warranty.

## For The Period Of: **GE Will Replace:**

### One Year

From the date of the original purchase

**Any part** of the freezer which fails due to a defect in materials or workmanship. During this **limited one-year warranty**, GE will also provide, **free of charge**, all labor and related service to replace the defective part.

## What GE Will Not Cover:

- Service trips to your home to teach you how to use the product.
- Replacement of house fuses or resetting of circuit breakers.
- Improper installation, delivery or maintenance.
- Damage to the product caused by accident, fire, floods or acts of God.
- Failure of the product if it is abused, misused, or used for other than the intended purpose or used commercially.
- Incidental or consequential damage caused by possible defects with this appliance.
- Loss of food due to spoilage.
- Product not accessible to provide required service.
- Damage caused after delivery.

**EXCLUSION OF IMPLIED WARRANTIES**—Your sole and exclusive remedy is product repair as provided in this Limited Warranty. Any implied warranties, including the implied warranties of merchantability or fitness for a particular purpose, are limited to one year or the shortest period allowed by law.

This warranty is extended to the original purchaser and any succeeding owner for products purchased for home use within the USA and Canada. If the product is located in an area where service by a GE Authorized Servicer is not available, you may be responsible for a trip charge or you may be required to bring the product to an Authorized GE Service location for service. In Alaska, the warranty excludes the cost of shipping or service calls to your home.

Some states do not allow the exclusion or limitation of incidental or consequential damages. This warranty gives you specific legal rights, and you may also have other rights which vary from state to state. To know what your legal rights are, consult your local or state consumer affairs office or your state's Attorney General.

**Warrantor: General Electric Company, Louisville, KY 40225**
